Dear customers and recumbent riders,

2020 marks the 20<sup>th</sup> anniversary of the founding of AZUB. It will be a year of celebrations for us, starting with our catalogue which tells the story of our company and of the people around. We will carry on celebrating with you at the SPEZI fair in Germany as well as at the RCC in USA, with the highlight of the year coming in September, when the Recumbent meeting will take place in Uherský Brod. We would be thrilled if you could come and join us, perhaps even riding your new model you might choose from the offer you are just now holding in your hands. Trust us, it will definitely be worth it! Apart from the actual meeting, we have also organized a grand pre-meeting tour, riding from Vienna, Austria all the way to our town. All the necessary information can be found on our website.

### HOW TO ORDER

The best and easiest way to put an order in is to contact one of our dealers. There are almost 80 all over the world and they will be happy to help you pick and order the right model for you. The same applies if you are just looking for some accessories or spare parts. Alternately, you can contact our sales department directly, we will be happy to help with any inquiry.

The best way to configure your bike is to visit our configurator at [configurator.azub.eu](http://configurator.azub.eu), where you can also place your order. Please, don't forget to enter your height and weight as well as any additional special requests you may have.

Well, that's about it for now, we hope you enjoy working with our price list!

Your AZUB team

## 2020 NEWS

### MAX 700

Our portfolio now includes a modified version of our MAX model. MAX 700 is built around 700c/28" wheels and is supplied with a front carbon fork and rear air shock as standard. This recumbent bike is fast and at the same time very comfortable. We loved it on our test rides throughout 2019 and even Dave Cornthwaite, a British adventurer who took this bike on a grand tour in USA was very impressed. In short, MAX 700 is a great choice for those of you who feel the need for speed, be it touring or commuting.

### Sturmey Archer CS-RK3 Tripleshift 27 speed

Many people from the recumbent community have been sad to learn that several years ago, SRAM stopped manufacturing their remarkable Dual Drive system. It combined a 3-speed hub and a cassette, offering 24, 27 and even 30 gears, with the cranks having only one chain ring, naturally without a derailleur. However, Sturmey Archer came up with a similar system, CS-RK3, and as of this year, we have included it in our shifting options offer. This hub makes the front part of the bike look more streamlined and allows you to change gears even when stationary.

### New names for levels of our custom-built bikes

Our custom-built bikes are available in three different levels. The first level includes selected models that have already been built. Their basic components are given and you can choose the individual accessories. This used to be Level 1, as of this year we have given it a much nicer name – **CORE LEVEL**. In the second level, you have an option to choose from several carefully selected component sets, various colours and a wide range of accessories. All available options can be found in our pricelists or the online configurator. This level used to be called Level 2 and now we are calling it **ADVANCED LEVEL**. In the last category, you can let your imagination run riot, come up with lots of unusual solutions and end up with a truly unique bike built just for you. It is therefore no wonder that we have decided to call this the **EPIC LEVEL**. This change has come about thanks to a close cooperation with several of our dealers who made the creation of new names their project, which helped us enormously. Many thanks! See the description of the individual levels on our website.

### Changes in standard colours

Now and again, it is necessary to make changes in the range of our standard colours. This year, we have decided to unify the colours of our CORE LEVEL trikes with the range of standard colours, swapping our high-gloss light green and high-gloss light grey for high-gloss turquoise and matt dark grey. We firmly believe that you will appreciate this change.

## CONDITIONS

### PRICES

All prices include VAT (21%). The AZUB recumbents are tax free (rate of duty) in export to European Union.

### SHIPPING

In person or by courier in a large size box (Perfectly adjusted, 95% assembled).  
No special tool needed. No technical skills needed.

### SHIPPING COST

Transport cost within EU is included in the price. (Valid only for complete bikes and frame sets).

Contact us for rates when shipping outside EU.

### PAYMENT

We accept bank transfer and credit card payment only. Orders have to be prepaid.

### NOTE

The components, assembly and colours may deviate from pictures and descriptions due to manufacturers and technical progress.

### OFF-SEASON DISCOUNT

5% from 1st of October to 30th of January.

Valid for orders of complete bikes/trikes or frame sets placed in AZUB or placed through our dealers. Important is the date when we receive the order.

Valid from 1st February 2020

## CHOOSE THE BEST OPTION FOR YOU

We have been building our bikes precisely according to our customers' requirements since the founding of our company. That's the way we keep doing our job up to these days. You can order bike from us either as a frame set to be equipped by yourself, or there are three different options – we call them levels – available for building your bike. It's just up to you if you choose the best-selling configuration that can be delivered within one week, if you configure your new bike with components from a preset group – this way we can finish your bike in 5 to 6 weeks, or if you come up with a totally personalized configuration.

## START BUILDING YOUR BIKE WITH US!

### CORE LEVEL

**Best-selling trike configuration with great price–performance ratio. You choose the accessories for your new trike.**

*Delivery time: 2 weeks*

We have selected a set of components that we consider most suitable for the majority of AZUB riders. Our aim was to offer a well-equipped and durable trike with a very short delivery time so that you can start riding almost immediately. You can choose accessories for your new trike. The two-weeks delivery time corresponds with the time of transport and potential customs declaration.

We offer the T-Tris 26, TRIcon 26 and Ti-FLY 26 in the CORE LEVEL.

### ADVANCED LEVEL

**Configure your dream bike to your taste and select from the parts we have tried and are always on stock. Choose your color and accessories.**

*Delivery time: about 6 weeks*

On the second level of our customer solutions service, you configure your bike to suit your needs. It is easy to get along with the process. You'll find your way through our quite big offer thanks to a description of each option that you find upon clicking on the image of your chosen part in our configurator. In any case, we are happy to help with the best combinations of your chosen components. We only need to know how often and in what conditions you are most likely to use your bike. We have the vast majority of components on stock, which allows us to build your bike in reasonable time. We can also guarantee our prices throughout the year.

Our favorite Color Shop is available at this level as well.

### EPIC LEVEL

**Unleash your fantasy and let us build a really unique bike for you.**

*Delivery time: depending on the availability of selected parts*

In case you didn't choose within the offer of the CORE LEVEL we are ready to cooperate with you and come up with a configuration that will completely meet your requirements. However, it is necessary to restrict your choices according to compatibility of components with the design of our bikes as well as the components' accessibility for us. Get in touch with your dealer or directly with us. Together we can prepare the most suitable bike configuration for you. As the next step, we will check on the availability and price of each component, verify compatibility (if possible), determine the approximate delivery time and calculate the price for you. The overall price will include an additional charge for the highly personal approach and will also reflect the time needed for ordering individual components, surcharges for shipping of the components and higher time demands of the building process. The additional charge will be between 50 to 500 EUR/USD.

The EPIC LEVEL configuration requires a thorough preparation and your cooperation in the components selection process. Be prepared for busier email communication. Unpredictable situations can arise in the course of the building process itself. For example, a supplier can change a certain part's specification or postpone its delivery. Anyway, you can be sure that we are ready to provide you with the best service possible. The best time to order a bike within the third level configuration is in autumn when we can devote much time to such unique projects. However, you can act out your fantasies even in summer.

#### **What desires are we able to satisfy?**

There is a vast list of components that we have a lot experience with (see the web page). We are quite sure that we can deliver them and install correctly. We don't want to hinder your fantasy though, and thus feel free to get in touch with any special demands. Before doing this, go through the list of components we are not able to offer.

#### **What are we not able to provide?**

Unfortunately, it is quite a big range of components. Mainly shifting systems are often incompatible with recumbent bike designs, with the gears needed, length of cables and cable housings necessary for recumbent bikes. We are not able to supply Campagnolo and MicroShift components. We don't like to combine different ranges of Shimano shifting components as well.

## CORE LEVEL TRIKES

## SHIMANO STEPS E6100 – the right direction

When choosing motors for our recumbent bikes and trikes, we always keep in mind the people who will be riding them. Are they tough mountain bikers who need brute force in any situation and are able to cope with it? No. Are they mostly cyclists who seek the occasional helpful hand and use their bikes for commuting or short outings? No.

Our AZUB cyclists like long trips, sufficient power and bikes that are easily controlled. That is why we have opted for the new Shimano Steps 6100 trekking set which provides not only excellent power of up to 500 W (250 W nominal power) but also a superb torque that will get you up even the biggest hills. At the same time, it is a set that you can combine with the Shimano Nexus Inter 5E automatic gear hub or other component lines. And in addition to all this, we offer as standard a battery with maximum capacity of 504 Wh that will give you 170 km/105 mi.

Our many years of experience have proved that the E6100 is the best set for recumbenters who have chosen our bikes. Trust us, we really have worked with electric motors for a long time. After all, two members of our team, Honza Galla and Karel Šebela, have taken part in a 7800 km/4875 mi long race of electric bikes powered by solar panels which took them from France all the way to Kazakhstan. Although they had to experiment with various motors and chargers, they returned with heaps of very valuable experience.

### TECH TALK

**Power:** 250 W

**Battery capacity:** 504 Wh

**Range:** up to 170 km/105 miles

**Chain wheel 20":** 44 teeth

**Chain wheel 26":** 38 teeth

## The Shimano Steps E6100 can be combined with selected components:

### Shimano Nexus Inter 5E Di2 electronic shifting

A gearbox integrated in the rear hub, offering a 263 % range, specially designed for electric bikes to prevent problems with the massive combined torque coming from the rider's feet and the motor. Thanks to the electronic shifting, you can change gears manually or enjoy the convenience of intelligent automatic shifting, savour the ride in itself and the beauty around you, not worrying about anything else. Another huge advantage is the option to change gears even when stationary, which applies to all the other integrated gearboxes anyway, such as Nexus, Rohloff and Pinion.

### Shimano Sora 1x9, or Shimano Deore 1x10

Traditional shifters using a derailleur and a 11 to 34, or 11 to 36 tooth cassettes, they are the basic economical option we have on offer.

### Enviolo 380 (formerly known as NuVinci)

A continuously variable automatic rear hub transmission, originally designed for industrial electric motors, so its use for electric bikes is, unsurprisingly, possibly the best choice. NuVinci will allow you to change gears even when shifting under power, that is when to motor is putting the power in and you will never have the feeling that it is under stress. Compared to the automatic Nexus Inter E5, the range of gears this option offers is larger by 1/3, that makes it 380 % that will allow you to get up even steeper hills under heavier loads.

### Rohloff - 14 speed gear hub

In comparison with other shifting systems for electric bikes, the Rohloff offers you a massive gear range of 526 %. With this, you will be able to get up any hill under any load. No steep part will pose a problem when moving off even if you have, for example, your huge canine friend behind you in a trailer. The Rohloff is simply the ultimate choice for extreme cyclists favouring electric bikes.

### SHIMANO STEPS E8000

For those of you who are thinking of riding through rugged terrain with really heavy loads, we can also fit your bike or trike with the Shimano Steps E8000 motor within our EPIC LEVEL project for custom-built bikes.

## HOW TO CHOOSE THE SIZE OF THE SEAT?

### BIKE SEATS

Choosing a seat for a recumbent bike is easy as the decisive factor is the rider's height.

**Size M** - up to 175 cm / 5' 8"

**Size L** - from 175 cm to 187 cm / from 5' 8" to 6' 1"

**Size XL** - above 187 cm / above 6' 1"

### TRIKE SEATS

#### Size M

An M size seat is suitable for shorter riders or for children.

The recommended maximum height of the rider is 170 cm / 5' 7".

The back part of this seat is 5 cm shorter and the seat is 3 cm narrower than our standard size seat (L).

#### Size L

The L sized seat is our most versatile option suitable for the vast majority of riders.

We recommend this seat for riders who are at least 170 cm / 5' 7" tall, there is no maximum limit. The seat is slightly curved at the top and together with the mesh cover it gives proper support even to very tall riders.

#### Size XL

Our largest seat is based on the design of the L size seat, however, this seat is 5 cm / 2" wider than the L size. In addition, the sitting part is 5 cm / 2" longer. This means that when the seat is fitted, it sits 5 cm / 2" higher than our standard L size, allowing for easier getting on and off. Correspondingly, the handlebars are also wider to allow good manoeuvrability.
